BIOGRAPHY

As one of the hardest working emcees in L.A. today, **Destruct** has shown what it takes to gain acclaim and respect in one of the most unforgiving music scenes in the world.

Born in Los Angeles, CA to a Brazilian mother and Chilean father. At the age of 17 **Destruct** entered the L.A. hip-hop scene and within his first three years, he has rocked hundreds of shows with legends like KRS-One, Dilated Peoples, Rakim, Method Man from Wu-Tang & more. **Destruct** has also collaborated with artists such as Grammy award-winning Sirah, Sean Price, Kev Brown, Blu and Exile to just name a few.

Destruct is here to be much more than your everyday Hip Hop artist, but a true contributor to the culture and lifestyle, progressing the movement forward.

Destruct is here for a legacy, not a trend!

MORE THAN JUST MUSIC

Destruct has been blessed as well to run his own studio "**Area 52**" in the city of Van Nuys, California, where he provides recording and executive producer services.

He runs also the film production company "**The Resident People**" where he has directed and filmed several music videos and short films with much more to come.

THE BEST YOU NEVER HEARD

DISCOGRAPHY

It's been a decade that **Destruct** has been in the music scene and has released **32 studio albums** including two with his live band "Inner City Soul".

Destruct's latest full LP - **The Best You Never Heard** - is his debut **vinyl release** which is released by **Mind The Wax**. The album showcases over 10 years of a heavily influenced music from the East to West coast. It contains tracks which were never meant to be all under one roof. Half of the album's songs were previously released as singles or in compilations and the other half is unreleased original brand-new music.

The album is a true picture of an **underdog story** of what passion and an undying will can showcase on wax, with legendary features such as Sean Price, General Steele of Smif-N-Wessun, Blu, Planet Asia and many more and with beats from Jake One, Exile, Moka Only, Kev Brown and other well-known producers.
